

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (original) An electric pipette (1) comprising a body (2), a tip part (4), a hook part (5), a push-button part (6) and a display part (7), said body (1) having a vertical axis (3), characterised in that at least one of the parts selected from the group consisting of the hook part (5), the push-button part (6) and the display part (7) is rotatable about the vertical axis (3) of the electric pipette (1).
2. (original) An electric pipette (1) according to claim 1, characterised in that at least one of the parts (5, 6, 7) is rotatable over 0-360 °.
3. (original) An electric pipette (1) according to claim 1, characterised in that at least one of the angles φ_1 , φ_2 or φ_3 is in the range $-90 - 90^\circ$.
4. (original) An electric pipette (1) according to claim 1, characterised in that at least one of the angles φ_1 , φ_2 or φ_3 is in the range $-70 - 70^\circ$.
5. (original) An electric pipette (1) according to claim 1, characterised in that at least one of the angles φ_1 , φ_2 or φ_3 is in the range $-50 - 50^\circ$.
6. (currently amended) An electric pipette (1) according to ~~any of claims 2-5~~ claim 2, characterised in that the axis of rotation (8) of the display part (7) additionally is at an angle α in the range 0-60 ° to the vertical axis (3) of the electric pipette (1).
7. (currently amended) An electric pipette (1) according to ~~any of claims 2-5~~ claim 2, characterised in that the axis of rotation (8) of the display part (7) additionally is at an angle α in the range 0-50 ° to the vertical axis (3) of the electric pipette (1).
8. (currently amended) An electric pipette (1) according to ~~any of claims 2-5~~ claim 2, characterised in that the axis of rotation (8) of the display part (7) additionally is at an angle α in the range 0-40 ° to the vertical axis (3) of the electric pipette (1).
